DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 26-45, drawn to a fuel injector.

Group II, claim(s) 46-50, drawn to a method of adjusting a fuel injector.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The fuel injector as claimed does not require the special technical feature of measuring a static flow rate and comparing it with a static setpoint flow rate. Stegmgaier et al. (5,383,606) is provided as evidence.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A, figure 2;

Species B, figure 3;

Species C, figure 5A;

Species D, figure 5B;

Species E, figure 5C;

Species F, figure 6A

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species A: Claims 26-32, 46-48
Species B: Claims 26-34, 46, 47
Species C: Claims 26-29, 35-38, 46-48
Species D: Claims 26-29, 35-37, 39, 46-48
Species E: Claims 26-29, 35, 40, 46-48
Species F: Claims 26-29, 35, 40-50

The following claim(s) are generic: 26, 46.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species lack the special technical feature of the shape of the adjusting body and sleeve, threads of the adjusting body, the threads of the sleeve, the tool used to adjust the adjusting body and the sleeve. Stegmgaier et al. (5,383,606) is provided as evidence.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
